Swatch Bharat :

These days eco-friendly or environmentally friendly concept is gaining more importance. ... Eco-friendly products promote green living that help to conserve energy and also prevent air, water and noise pollution. They prove to be boon for the environment and also prevent human health from deterioration.

It has become mandatory for us to educate these to younger generations. Schools have already started implementing these in the form of Projects, workshop, seminars etc.,

To safeguard the interest of living creatures and to keep Air, surroundings, Atmosphere clean we are inculcating our students about this new concept in the form of workshop.

During one such workshop held at Guntur Subbiah Pillai Girls Higher Secondary School, Chennai , Shri Nirmal, Founder President- Exnora International was invited and he stressed the importance of keeping the surroundings clean, Mosquito free, how to safeguard the environment and need for planting trees etc.

Shri Nirmal made a great impact on our students who came all the way from Kumbakonam to attend this Workshop. He conducted the Workshop in a most effective manner thro' live Audio and Video Presentation which was welcomed by students and shown greater interest on the subject.

Dairy of Dreams :

This is a new concept we have introduced to our Students this year. Each student is encouraged to dream big and dream with conviction. They then pen their dreams in their Diary of Dreams .

The concept is that when dreams are penned on paper, the student commits the dream to his/her subconscious.

Ullas Trust- Unit of Intellect Design Arena Ltd (formerly Virtusa Polaris Software) Team conducted one day workshop at Chennai and our students from Kumbakonam and surrounding villages attended this program.

The Volunteers headed by Ms. Sukanya Sreenivas of the Ullas Trust thro various demonstrations explained in detail the impact of dreaming and how it will be achieved in reality.

To Seed the thought of looking beyond their immediate environment and encourage them to dream big and articulate their dreams in a specially designed dairy of dreams, the concept was well taken.

Also students got an opportunity to come out with their dream Personalities and rationale behind choosing them and how to achieve their dream in their personal life career.

Touch the Soil :

It is a Unique Program that spreads the power of Dreams to Students studying in High School in Districts. The concept was formulised by Ullas trust and We , in our foundation act as a Facilitator.

Using our Clout we identify the Schools located in Villages and Urban areas of various districts and Team Members of Ullas Trust CSR group will conduct the workshop for students of 9th std 11th on the first year and 10th and 12th std in the second year.

One such Workshop was held in Town Higher Secondary School, Kumbakonam where large number of Students of Target group have actively participated and penned their dreams on the dairy.

Every student were given a chance to talk about their dreams on the stage

Five Top ranking students were offered Scholarships during workshop.

Our Association with Ullas trust on this new concept have identified many aspiring students of Districts and brought to limelight and there by those students are able to take the next step of achieving the goal as visioned Dr.Abdul Kalam ji

Personality Development Programs

During the Workshop, Corporate trained Consultant Shri TN Vittal

conducted variety of Programs in the form of game show to improve

the Self Motivation among the students, Stress Relieving Exercises, Time Management and Identifying the Patterns etc.,

Career Counselling :

To have better clarity, about Future Academic course we have conducted Course Counselling Program for our Students in Twelfth.

We invited Senior Professors from Engineering college, who in turn have dealt in detail about the Availability of Various courses, their Scope, Offering Institutions, various modalities regarding admission and Future employment etc.,

This Proram has a very Positive and excellent response.

Education Support Scheme :

Beides conducting free coaching , Workshop, Training Students to adapt according to current situation , we are also supporting students of below Poverty line to reduce Financial burden for their education.

Inspite of lot of Charitable institutions extending support for education to Under Privileged , Govt introducing legislations for Right to Education, the gap is still vast due to insufficient knowledge or may be due to lack of system. Nevertheless, Country's growth depends only on Literacy which will remove Poverty , for this to happen People from all walk of life should come forward voluntarily and adapt educating a child.

We in our Foundations, we always give importance for this noble cause and extend support.
